Taylor,

We have some written comments regarding the proposed regulations for risk limiting audits.

1. The regulations should clarify what specific Cast Vote Records are available for public inspection. Under current regulations, it sounds like the public would be able to view the entire cast vote records for the entire election, as opposed to the cast vote records that are being compared.
2. We would like to not have the regulations completely disallow Statewide contests to be included in the risk-limiting audit. These large contests are where the benefit of the risk-limiting audit can truly be realized.

Please let me know if you have any questions.

Thank you,  
Justin Berardino
